

Expalum began its activities in 2002 in the roller shutter slat business, manufacturing several kinds of slats and boxes. Expalum could count on the 30-year experience of its founder company Cristales y Persianas López, S.L.

Since 1995 our slats and boxes have been distributed in the Spanish and Portuguese markets. Our vision of the future and our will to reach to new markets in Europe and America has motivated the construction of our new plant, inaugurated on March 2008. This plant is located in Fuente del Maestre (Badajoz).

We have added since two more companies to the holding: EXPALUM ARGENTINA in 2009 and a year later EXPALUM BRAZIL. These two units will allow us to serve quickly South America and the Caribbean countries.

The EXPALUM team is glad to present our new catalogue displaying our products
